

"Husband Murdering"

Dr. Nahid Tavassoli

"Husband Murdering", a new bitter event in Iran since last two decades, is being considered under the subtitle of *"Family Murdering"* which used to occur in the traditional, tribal & religious society of Iran since long ago. Moslem Iranian Women, being behaved, hurt & abused by men (as their fathers, brothers, husbands...) feel an old deep hidden hatred, anger & grudge against them. Not being able to face such contempt, they used to commit suicide or self burning.

Now, on account of many different changes, such as the new world telecommunications, satellites, the Internet and also the new updated interpretation of the religious texts instead of the old incorrect, false patriarchal traditional interpretation, many taboos are being destroyed. Women, now, aware of their "Human Rights" have learned to behave, act and live as a subject, using their Female/Maternal Abilities and Rights.

This paper is going to give some statistical samples and distinctions of different kinds of *"Husband Murdering"*, which now seems to be a new reflection of women against their husbands, instead of committing suicide or self burning.

Investigating "*Husband Murdering*", this paper discusses and analyses the sociological, psychological, sexual, social, political, cultural and economic situations & problems as effective factors in such issues like misdemeanors, addiction, faithless, treachery, as a disasters and tragic events which is exiting in Iran's traditional tribal **community**, moving towards a Modern **Society**.

The paper also explains and criticizes **Compulsive, Permanent & Contemporary Marriage**, causing "*Husband Murdering*".

All these oppressions, together with being aware of their Human Rights, have made women realize that they have the Right to fall in love with the one they want as their Rights. This is why they are beginning to rebel against the oppressed situation in which they were obliged to live with a man whom, not only they did not know, but also hated.

In this situation they make love and sex with the first man whom they get to know and when their liaison with the strange man becomes evident, knowing that they would be stoned, to get rid of their husband, the first thing they do is to kill him with the help and the participation of the strange man.

Besides "*Husband Murdering*", some other kinds of "*Murdering*" are also being committed by women, the route of which originates from the same problems concerning such complicated situations with which they are involved.
